New Indiana Law Requires Certification of one food handler per establishment by 12/31/04

Certification is achieved by passing an approved exam.

**The ServSafe online course provides the necessary information
needed for successful completion of the exam.**

SERVSAFE® is a nationally recognized program developed by the foodservice industry dedicated to helping the restaurateur prevent foodborne illness potentials. Public concern about food safety has never been greater. For your customers, safe foodservice is a matter of trust. For you, keeping that trust is a matter of survival.

SERVSAFE® is the most universally recognized and accepted course by state, county and municipal health authorities that require sanitation training of foodservice managers. The **SERVSAFE® exam is one of only three exams that meets the NEW Indiana certification requirements.**

SERVSAFE® focuses on the Hazard Analysis Critical Control Point (HAACP) systems of food safety. HACCP traces the flow of foods through a foodservice operation, concentrating on those critical areas where contamination is most likely to occur.
